INTRODUCTION

Control4 Entertainment Solutions

At Control4, we strive to be your comprehensive AV and automation solutions partner—delivering much more than inputs and outputs, product specs and features. Control4 entertainment solutions create the ultimate audio/video experience—in one room or every room. Your clients will be able to experience the latest 4K movies, stream high-resolution music, enjoy limitless entertainment with a single remote or create an unrivaled home theater experience.

Here's why it makes sense to rely on Control4 for your entertainment needs:

Integration-Friendly AV Solutions
Control4 AV products allow for simplified programming and flexible installation options. And Composer Pro, combined with an ever-growing list of IP, serial and IR drivers for third-party products, drastically reduces system setup time—allowing you to get in, get out and get paid, faster.

Sales, Design and Installation Resources
An assortment of consumer literature, videos and demonstration equipment, as well as dealer installation videos and documentation are available—giving you the tools you need to get more jobs and to get them done right the first time. Check out the "Resources" section of the Control4 portal to see it all. We also offer AV design services where Control4 Audio & Video experts work with dealers to design both video and audio distribution systems. Control4 will provide a list of products with a budgetary bill of materials.

Online, Anytime Ordering
The Control4 Portal is an award winning e-commerce site that gives you the flexibility to research products and place orders when it is most convenient for you.

Partner AV Solutions
A huge assortment of third-party AV products, carefully selected to complement Control4 entertainment solutions are available for order on the Control4 portal. Many products include certified drivers—so you can be confident they will integrate seamlessly with Control4. In addition, all partner product purchases go toward your annual Control4 purchase requirements and count towards dealer status.

Award-Winning Service and Support
Ready to assist you every step of the way, our service and support teams help ensure successful installations and satisfied customers. In addition, Control4 offers comprehensive product warranties and service on all Control4 AV products providing the added assurance that your installations are covered.

INTRODUCTION

The Control4 Entertainment Advantage

Control4 brings the power, performance and reliability to deliver the best entertainment experience over one, robust platform. With support for nearly 10,000 devices from hundreds of world-class brands, Control4 solutions are designed to work with the consumer electronics and appliances you already trust and love to provide superior sound, stunning 4K Ultra HD video, high-resolution audio, and powerful automation. Your clients will have the ability to enjoy music and video from a variety of sources, in just one room or throughout the entire home. All Control4 entertainment products showcase a consistent, sleek industrial design that lends a polished, professional look to any rack or room.

The Control4 Entertainment Family

4K Ultra HD

Control4 offers a full line of audio and 4K Ultra HD video matrix switches, perfect for any Control4 Smart Home. These products are loaded with features to ensure the best multi-room video experience and a clean and simple installation in each room. We've also made it easier to install, configure and deliver the ultimate 4K experience and distribute copy-protected 4K Ultra HD video content throughout the home. For maximum flexibility, Control4 offer audio downmixing models that allow for simultaneous surround sound and stereo audio to be distributed from the same source. All popular Dolby® and DTS® formats are supported, including Dolby Digital, Dolby Digital Plus, Dolby TrueHD (lossless), Dolby Atmos®, DTS-ES™, DTS-HD, and many others.

High-Resolution Multi-Room Audio

The EA Series Entertainment and Automation Controllers feature advanced audio architecture and multiple audio zones to stream high-resolution music throughout the home. Your clients will enjoy one-button access to simultaneous streams of high-resolution music.

Native Streaming Services

As part of every Control4 system, clients can enjoy access to millions of songs and thousands of artists through popular native streaming music services—such as Pandora, TIDAL, Deezer, Napster, and TuneIn—without the need for additional gear.

Native Support for Airplay-Enabled Devices

Shairbridge brings a simple, reliable solution for sharing music from an iOS smartphone or tablet. As a simple driver, Shairbridge means there is no need for any additional hardware to enjoy music from an iOS device.

Total HDBaseT™ Class A Technology

Control4 video matrix switches feature HDBaseT Class A support with every port, giving you the most flexibility during installation. Every audio and video switch can deliver uncompressed 4K Ultra HD video and multi-channel audio over a single Category cable. An Integrated Ethernet switch distributes Ethernet connectivity to remote locations without having to run another network cable, saving you both time and money

16 × 16 Audio Matrix Switch

The go-to solution for Control4 distributed audio installations. The Control4 Audio Matrix Switch provides seamless integration and two-way feedback with Control4 user interfaces. Features include wide dynamic range and smooth volume ramping for superior sound quality.

100 Series 4- and 8-Zone Non-Matrix Amplifiers

Built for installations small, large and everything in between, these flexible amplifiers provide 55W per channel and are stable to 4 ohms. Features include bridgeable amplifier outputs for larger speakers and audio zones, automatic signal-sensing inputs for energy savings and line-level loop outputs for scaling to larger installations.

4- and 8-Zone Matrix Amplifiers

Full matrix switching, amplification and volume control in one product. 60W (4-Zone) and 120W (8-Zone) per channel, combined with an advanced parametric equalizer, deliver professional quality sound.

Wireless Music Bridge

This award-winning streaming audio solution allows your clients to stream virtually any music service from a phone, tablet or computer throughout the home or office. Use the Wireless Music Bridge to instantly stream music to one or multiple audio zones. Best of all, programming can be completed in about 15 seconds within Composer Pro!

INTRODUCTION

The Control4 Ecosystem

When Control4 and partner AV products are combined within a Control4 ecosystem, your clients experience an immersive audio and video experience. Technology disappears, and the user simply interacts with their favorite movies and music from an intuitive Control4 user interface.

At Control4, our commitment is to continue the development of innovative entertainment solutions, while also expanding our driver database for third-party products—further enhancing the Control4 audio/video experience and making Control4 your source for all things AV.

About This Guide

The *Entertainment Solutions Guide* was created to provide dealers with a few system examples, showing how Control4 and partner products can integrate in a Control4 ecosystem. In addition, key products are highlighted to assist in the design and specification of media distribution systems.

To learn even more about each product and view content such as product videos, data sheets, documentation and more, be sure to visit the Control4 Portal. Detailed information can easily be found by either browsing through the Products section or by entering the product SKU number (listed in this guide) into the Search field of the Control4 Portal.

Control4 Entertainment Solutions are completely scalable from small to very large projects, both residential and commercial. Start with just one room and add on when interests or needs change. Or go big from the beginning and automate the entire home.

Following is an example of a small AV solution for a residential application. This model can be expanded to fit larger projects by adding more rooms or zones of lighting, video and audio with the applicable products.

SMALL RESIDENTIAL AV SOLUTION

SOLUTION BENEFITS

Access to cloud-based music and movie services, local hard drive-stored media content and satellite TV in up to six rooms.

Intuitive control over all media content and AV equipment throughout the house from simple Control4 user interfaces.

Use the Control4 Shairbridge driver or the Wireless Music Bridge to stream audio from a mobile device or computer to any designated area of the home.

On-screen control in the living room of all system features, including control of local AV equipment—replacing multiple remotes with one simple user interface.

Centralized placement of audio and video equipment greatly minimizes equipment and wiring clutter in each room.

MEDIUM RESIDENTIAL AV SOLUTION

SOLUTION BENEFITS

Everyone sees, hears and controls what they want: access to multiple, simultaneous streams of cloud-based music, movie services, local hard drive-stored media content, satellite TV and Blu-ray players in up to eight zones throughout the house.

By using the Shairbridge driver or a Wireless Music Bridge, two family members can simultaneously stream audio from their personal mobile device or computer to one or multiple zones throughout the house.

On-screen control in the theater and living room commands all system features, including control of local AV equipment—replacing multiple remotes with one simple user interface.

Maximum video and audio resolutions in the theater and living room by utilizing the Control4 4K Ultra HD 8x8 AV Matrix Switch zone locking feature.

Intuitively control all media content and AV equipment throughout the house from Control4 user interfaces.

Centralized placement of audio and video equipment greatly minimizes equipment and wiring clutter in each room.

Local Blu-ray player in the master bedroom can be viewed in and controlled from other zones.

LARGE RESIDENTIAL AV SOLUTION

SOLUTION BENEFITS

A fully integrated, seamless audio/video experience in every room: access to multiple, simultaneous streams of cloud-based music, movie services, local hard drive-stored media content, satellite TV and Blu-ray media in up to 16 zones with audio being available in four additional zones.

Intuitive control and management of all media content and AV equipment throughout the house from simple Control4 user interfaces.

Using the Shairbridge driver or the Wireless Music Bridge, two family members can simultaneously stream audio from their personal mobile device or computer to one or multiple zones throughout the house.

On-screen control in the theater and media room commands all system features, including control of local AV equipment—replacing multiple remotes with one simple user interface.

Outdoor speakers get extra power from the bridged outputs of Control4 power amplifiers.

Maximum video and audio resolutions in the theater, media room, living room and pool house by utilizing the Control4 4K Ultra HD 10x10 AV Matrix Switch zone locking feature.

Local Blu-ray player in the master bedroom can be viewed in and controlled from other zones.

RESTAURANT AV SOLUTION

SOLUTION BENEFITS

Up to 10 unique satellite TV programs can be displayed in full 4K Ultra HD on video displays throughout the facility, providing patrons with a variety of engaging content.

Two simultaneous audio feeds from satellite programming can be routed to any speaker location, immersing visitors in an exciting audio and video experience.

Audio plays in designated areas of the restaurant simply by streaming audio from a mobile device or computer using the Shairbridge driver or the Wireless Music Bridge.

Microphone input on the PA amplifier allows for paging to all speakers.

A Control4 In-Wall Touch Screen using the SAVI commercial platform interface provides intuitive control and management of all TV programs and AV equipment throughout the facility.

Centralized placement of audio and video equipment greatly minimizes equipment and wiring clutter throughout the facility.
